

Download Birth Emergency Skills Training Manual For Out Of Hospital Midwives Ebook

Midwives attending childbirth in homes and birth centers seldom encounter emergencies, but when crisis occurs, lives hang in the balance! It is difficult to remain proficient in skills so seldom practiced, yet pregnant women rely on the expertise of the provider in an emergency. Course Description. The Basic Life Support for Healthcare Providers (BLS) Classroom Course is designed to provide a wide variety of healthcare professionals the ability to recognize several life-threatening emergencies, provide CPR, use an AED, and relieve choking in a safe, timely and effective manner. Dear Twitpic Community - thank you for all the wonderful photos you have taken over the years. We have now placed Twitpic in an archived state. Kangaroo mother care (KMC) is a method of caring for newborns initiated in Bogotá, Colombia, in 1978. 1 It is underpinned by the theory that newborns, including premature and low-birth-weight (LBW) infants, should not be separated from their mothers and families. 2 The following is one of the most recent definitions of KMC: 'a standardized, protocol-based care system for preterm and/or LBW ...
