The division establishes policies and procedures for statewide fleet management and supports the department's fleet management software system. Fleet Operations works closely with headquarters and field offices to develop plans for fleet utilization, equipment acquisition and disposal, maintenance and emergency management. For example the U.S. Department of Defense requires the development of a Facility Electronic Operation and Maintenance Support Information (eOMSI) manual for a facility that houses engine test cells. Others may simply require that equipment vendor/manufacture commercial manuals be organized by service or trade, and compiled in 3-ring binders.
